

SHAIK SADIQ

Java Backend Developer | Generative AI Developer

+91 8328494828 | sadiqmaqbul@gmail.com | [LinkedIn](#) | [GitHub](#) | Bengaluru, Karnataka, India

SYNOPSIS

Java Backend Developer with 2+ years of experience in designing, developing, and maintaining scalable, secure, and cloud-native enterprise applications. Currently working with American Express through TCS on digital transformation and Generative AI initiatives. Experienced in Java, Spring Boot, Microservices, REST APIs, CI/CD, Cloud Technologies, and AI-powered solutions leveraging LLMs and RAG architectures. Passionate about building intelligent, business-driven applications that deliver measurable impact.

EDUCATION

Bachelor of Computer Science, Saveetha School of Engineering June 2019 - May 2023
CGPA: 8.9

TECHNICAL SKILLS

Programming Languages	Java, Python (Advanced), SQL, JavaScript
Backend Development	Spring Boot, Vert.x, RESTful APIs, Microservices Architecture
AI & Generative AI	Generative AI, Large Language Models (LLMs), RAG, GPT-4, GPT-5, Prompt Engineering
Frontend Technologies	HTML5, CSS3, JavaScript
Databases	PostgreSQL, MongoDB, Couchbase, MySQL, Vector DB (pgvector)
DevOps & Cloud	Maven, Gradle, Git, Jenkins, Docker, Kubernetes, AWS, Microsoft Azure, GCP
Security	JWT, OAuth 2.0, Certificate Management
Testing & Quality	JUnit, Mockito, JaCoCo, SonarQube
Monitoring & Logging	Splunk, Kibana, OpenSearch, Log4j, Logback
IDE & Tools	IntelliJ IDEA, PyCharm, VS Code, Eclipse, Postman
Project Management	Jira, Confluence
Methodologies	Agile, CI/CD
Soft Skills	Problem-Solving, Communication, Time Management, Teamwork

EXPERIENCE

Generative AI Developer Tata Consultancy Services Client: American Express — Phoenix, AZ	June 2026 - Present <i>Bengaluru, India</i>
Enterprise Generative AI platform that helps employees discover existing innovation ideas, onboard new use cases, and automate innovation management workflows.	
Java Backend Developer Tata Consultancy Services Client: American Express — Phoenix, AZ	Apr 2024 - June 2026 <i>Bengaluru, India</i>
Enterprise-scale platform enabling businesses to securely receive, process, and manage digital receipts through third-party integrations.	

PROJECTS

Squad Navigator - Enterprise Innovation Assistant

2026

Python, FastAPI, LangChain, RAG, LLMs, PostgreSQL

- Developed an enterprise Generative AI platform enabling employees to discover existing innovation ideas and onboard new use cases through conversational AI.
- Implemented Retrieval-Augmented Generation (RAG) architecture to provide context-aware knowledge retrieval and intelligent recommendations.
- Integrated vector databases for semantic search and efficient information retrieval.
- Built FastAPI-based backend services supporting chatbot interactions and workflow automation.
- Automated idea onboarding, contribution tracking, and innovation lifecycle management processes.

Enterprise Digital Receipts

2024 – 2026

Java, Spring Boot, Vert.x, PostgreSQL, Docker, Kubernetes

- Developed and maintained enterprise-grade backend microservices for secure digital receipt processing and management.
- Designed and implemented RESTful APIs with JWT-based authentication and authorization.
- Integrated external partner systems and managed certificate-based secure communications.
- Supported CI/CD pipelines using Jenkins, Docker, and Kubernetes.
- Monitored production applications using Splunk, Kibana, and OpenSearch to ensure high availability and performance.

AI-Powered Incident Resolution Assistant

2026

Python, FastAPI, LangChain, Multi-Agent AI, RAG, PostgreSQL

- Developed an intelligent incident resolution platform that analyzes application errors and recommends actionable solutions using Generative AI.
- Designed a multi-agent architecture utilizing three Large Language Models (LLMs) for root cause analysis, solution generation, and validation.
- Implemented automated secret masking to remove sensitive information such as API keys, tokens, passwords, and URLs before AI processing.
- Integrated RAG pipelines to retrieve historical incidents, troubleshooting guides, and knowledge articles for contextual recommendations.
- Built a recommendation engine that consolidates responses from multiple AI models and provides ranked resolution suggestions.

AI Friday Innovation Challenge - AI-nstein Squad

2026

Python, Generative AI, Multi-Agent AI, RAG

- Developed an AI-powered enterprise solution during the AI Friday innovation event to address business process automation challenges.
- Designed and implemented multiple AI agents to automate workflow execution and intelligent decision-making.
- Leveraged Large Language Models (LLMs) and RAG techniques to deliver accurate and context-aware responses.
- Collaborated with team members to deliver a working prototype within a constrained timeline.
- Received Special Mention recognition for innovation, technical excellence, and business impact.

CERTIFICATION

Microsoft Certified: Azure AI Engineer

Issued by Microsoft — April 2025 - April 2026

Earned expertise in designing and implementing AI Solutions using Azure Cognitive Services, Azure Applied AI Services, and machine learning capabilities to build intelligent and scalable application.

Microsoft Certified: Azure Network Engineer Associate Issued by Microsoft — May 2025 - May 2026
Validating expertise in designing, implementing, and managing Azure networking solutions, including hybrid networking, routing, security, private access to Azure services, and network monitoring.

AWS Certified: DevOps Engineer – Professional Issued by AWS — July 2025 - July 2026
Demonstrated expertise in automating and managing distributed systems on AWS, with a strong focus on CI/CD, infrastructure as code, monitoring, and security best practices.

ACHIEVEMENTS

- **Innovation Award – American Express & Tata Consultancy Services**
 - Recognized for developing innovative solutions that delivered business value and enhanced operational efficiency through technology-driven initiatives.
- **OnSpot Award – Tata Consultancy Services**
 - Awarded for outstanding contribution, ownership, and excellence in project delivery while supporting critical enterprise applications.
- **AI Friday Special Mention – AI-nstein Squad**
 - Received Special Mention during the AI Friday Innovation Challenge for developing an innovative Generative AI solution leveraging LLMs and AI-driven automation.
